## **Azaan International School**

| Grade: IV   | Wor                   | Worksheet                 |        |                 | Subject: Science |
|---|-----------------------|---------------------------|--------|-----------------|------------------|
| Name:   |                       | _ Date:                   |        | _ Roll no:      | _ Sec:           |
|   | Chapter 3:            | Teeth and M               | icrobe | 6               |                  |
| l. Tick the correct optic                             | on.                   |                           |        |                 |                  |
| 1. The hardest substance                              | e in our body is      |                           |        |                 |                  |
| a. dentine  | b. enamel             | c. crown                  |        | d. bones        |                  |
| 2. There are a total of 4 _                           | in each               | jaw.                      |        |                 |                  |
| a. premolars  | b. molars             | c. canines d. none of the |        | ese.            |                  |
| 3. What type of teeth are                             | used when you bite i  | nto a guava.              |        |                 |                  |
| a. canine   | b. premolar           | c. incisor                |        | d. molar        |                  |
| 4. The tiny living things ca                          | alled microbes can be | e found in the            |        |                 |                  |
| a. air  | b. Water              | c. soil                   |        | d. all of these | €.               |
| 5. A microorganism that o                             | causes common cold    |                           |        |                 |                  |
| a. fungi  | b. virus              | c. bacteria               |        | d. protozoa     |                  |
| II. State true or false.                              |                       |                           |        |                 |                  |
| A set of temporary teeth consists of 32 teeth in all. |                       |                           | [      | ]               |                  |
| 2. Teeth help us to speak properly.                   |                       |                           | [      | ]               |                  |
| 3. Mushroom is a fungus which is eaten as food. [ ]   |                       |                           |        |                 |                  |
| 4. Some microbes help in digestion of food.           |                       |                           | [      | ]               |                  |
| 5. There are four types                               |                       | [                         | ]      |                 |                  |
| III. Identify the types of                            | teeth.                |                           |        |                 |                  |
|   | b. /\                 | . /                       | ip     | .i              | $\wedge$         |
| a.  | b. ( )                | C.                        |        | d.              |                  |
|   |                       |                           | N      |                 | V                |

| 1. An adult has                     | _ teeth in the lower jaw and | teeth in the upper jaw. |
|-------------------------------------|------------------------------|-------------------------|
| 2. The part of teeth that is seen a | above the gums is called     |                         |
| 3. Teeth are held in place by the   | ·                            |                         |
| 4. Bits of food left over in the mo | outh can cause               |                         |
| 5. Some microbes cause              | others are                   |                         |

## V. Match the words in the two columns.

IV. Fill in the blanks:

| Column A     | Column B    |
|--------------|-------------|
| 1 incident   |             |
| 1. incisors  | a. grinding |
| 2. canines   | b. cutting  |
| 3. premolars | c. tearing  |
| 4. molars    | d. crushing |
